# C-CIDE

Industrial Strength Concentrate  
Deodorizer - Degreaser - Cleaner

Correspondence address:  
P O BOX 2257  
CLAREINCH  
7740

### Description:

Extraordinarily powerful citrus based cleaner, degreaser, and deodorizer containing emulsifiers and orange extracts that are 100% naturally derived and 100% biodegradable. Dilutes up to 4 to 10ml per litre for many cleaning and deodorizing applications.

### Benefits:

- USDA C1
- Non-Corrosive
- 100% Biodegradable
- Environmentally-Friendly
- 100% Natural Citrus Solvent
- Made From Renewable Resources
- Excellent Solvency - Cuts Oil and Grease
- Contains No Petroleum Or Petroleum Distillates
- Contains No Acids, Bases, Chlorides, Or Alcohols

### Designed for use in the following locations:

- Industrial Facilities
- Manufacturers
- Automotive Repair Shops
- Cleaning & Maintenance Services
- Commercial Printers
- Fabricated Metal Products
- Highway Paving
- Contractors
- Schools
- Nursing Homes
- Marinas
- Warehousing Facilities
- Ships
- Refineries
- Parks & Recreations

### Application:

**Deodorizing:** For room deodorizing, spray C-CIDE directly to upper corner of room. Repeat in each corner allowing fresh citrus scent to come to center of room. For larger areas, add 50 to 100 ml of C-CIDE per litre of water in humidifier. Operate 2 to 5 minutes per 30 cubic metres of space. For additional deodorizing, spray C-CIDE directly into bed pans, floor drains, air conditioning filters, portable toilets, sinks, and urinals. For floor deodorizing, add 400 to 500ml into 25 litres of cleaning solution and mop in normal manner.

**Degreasing:** For drains and grease traps, pour at least 500ml of C-CIDE directly into the drain. Allow to stand for 15 to 20 minutes, followed by warm water flush. Plunge if necessary. For grease traps, add 1 litre C-CIDE for every 15 litres of grease in the trap.

For degreasing floors, walls, and equipment, add 200 ml C-CIDE per 5 litres water in a mop bucket. Apply solution liberally to greasy surfaces with mop, sponge, or cloth. Allow to penetrate for 5 minutes and flush with water. After degreasing, pour mop bucket solution down drain for additional degreasing.

**Cleaning:** To spot clean floors and walls, including such tough problems as rubber tire marks, deep scuffs, and most graffiti, spray C-CIDE directly onto surface to be cleaned. Let soak 5 to 10 seconds. Using hand pressure, wipe surface clean with cloth. For vehicles and road machinery, remove cosmoline, tape, tar, and tree sap by spraying C-CIDE directly onto surface to be cleaned. Let soak 20 to 30 seconds. Using a brush, work into surface. Rinse with hose or pressure washer. For vinyl tops, spray C-CIDE directly onto surface to be cleaned. Let soak 30 seconds. Using hand pressure, work into surface with clean cloth or brush. Wipe off dirty residue. Buff lightly to shine.

**Removing Asphalt and Tar:** Spray on a 10 sq. m area without diluting. Allow to soak for 3-5 minutes to penetrate and dissolve. Hose down using water pressure. For stubborn areas, scrub with a brush or scouring pad to rinse.

### Specifications:

pH @ 25°C (ASTM-E-70)	.....	Neutral
Density @ 25°C (ASTM-D-287)	.....	0.85 g/mL
Color (visual)	.....	Clear yellow
Appearance @ 25°C (visual)	.....	Clear (conc.) Milky White (diluted)
Odor	.....	Citrus
Health / Flammability / Reactivity	.....	1 / 2 / 0
Personal Protection	.....	B - Glasses and Gloves
