# Coil and Filter Cleaner

## Description:

Aluminum safe air conditioner coil and permanent filter cleaner. Cleans and brightens even the softest metals safely, without scrubbing or steam cleaning.

## Benefits:

- \* Concentrated to be economical and easy to use, requires no scrubbing
- \* Buffered and inhibited so that it is safe on soft metals like aluminum, brass, and copper
- \* Non-flammable, non-caustic, non-acid, and solvent-free so it is virtually non-hazardous
- \* Contains no ozone depleting materials and no toxic chemicals subject to the reporting requirements of section 313, 40CFR372

## Application:

### Air Conditioner Coils:

For normal cleaning - in plastic container mix 1 part concentrate with 10 parts water. Pour the solution into a Momar Working Dilution Bottle and use the Ergonomical Sprayer to apply the solution onto the coils. Allow to soak for 3 to 5 minutes and rinse thoroughly with water. For extremely dirty or oxidized coils, use a solution of 1 part concentrate to 5 parts water for cleaning.

### Permanent Filters:

Remove filters and follow the directions for Air Conditioner Coils.

### Dip Application:

If a dip application is more convenient, mix 1 part concentrate with 10 parts water in a plastic, steel, or stainless steel container. Soak the air conditioner coils or permanent-type metal filter in the solution for 3-5 minutes. Remove and rinse thoroughly with water from hose. Aluminum equipment should not be soaked longer than 30 minutes.

## Specifications:

pH	.....	12.5 to 13.5
Density	.....	1.18 gm per cc
Foam Height	.....	High
Color	.....	Light amber
Appearance	.....	Thin clear liquid
Odor	.....	None
% Solids (140°C for 40 minutes)	.....	15 - 20%
Inhibited	.....	Yes, for safety on soft metals
Health / Flammability / Reactivity	.....	1 / 0 / 0
Personal Protection	.....	B - Safety glasses and gloves
