

CRYSTALTM

DISHWASHING MACHINE COMPOUND

Description:

CRYSTAL is a low-foaming, alkaline detergent designed for use in a machine dishwasher to remove tough soils, grease and grime from china, glass, plastic, metal, and aluminum. This powerful blend combines non-foaming detergents, phosphates, alkaline detergents and builders, and water softeners.

Benefits:

- Powerful Grease Cutting: Works on contact to cut through tough grease and soils.
- Water Softening: Works in both hard and soft water environments.
- Free-rinsing: Rinses freely, eliminating scale and scum buildup in dishwashers.
- Non-foaming: Generates no foam.
- Safe: Completely safe on aluminum, brass, cast iron, china, plastic, porcelain, silver, stainless steel, or any other surface that is safe to use with water.

Application:

1. Maintain water at 60 - 70 deg C.
2. Add CRYSTAL as directed below per 5 liters of water:
Soft Water: (0-4 grains): 20 gm
Moderately Hard (4-7 grains): 40 gm
Very Hard (>7 grains): 60 gm
3. Wash for 20 to 30 seconds.
4. Rinse for 15 seconds at 80 deg C.
5. Replenish CRYSTAL compound as needed.
6. Flush machine between meal periods.

Excellent for
School Lunchrooms • Cafeterias • Nursing Homes
Restaurants • Institutional Kitchens
