August 16, 2007

Dear Momar/LuBest Customer,

The LuBest Division of Momar has offered a wide variety of food-grade lubricants to its customers for over 25 years. Whether your equipment calls for a food-grade aerosol, oil, or grease, the LuBest Ivory products can fill your needs. All of the Ivory product line is formulated to meet USDA H1 and FDA standards for lubricating equipment where there are food contact areas.

Ivory 3333 is a high temperature, multi-purpose food grade grease. Its Aluminum Complex base gives it exceptional resistance to water washout. Perfect in applications where there is frequent wash down and sanitization of the equipment. This grease also contains anti-wear and anti-rust and corrosion additives to provide additional protection to your equipment.

LuBest Outa-Sight is the aerosol version of Ivory 3333. This product gives you all the benefits of Ivory 3333 in a convenient aerosol form.

The Ivory-sol product line consists of a unique blend of synthetic oils designed to give superior performance over conventional food grade oils. These products contain extreme pressure and anti-wear additives as well as anti-wear and anti-rust and corrosion additives. This allows these products to be used in a wide variety of food grade applications, including compressors, hydraulics, and gearboxes.

No matter what type of food equipment you need to lubricate, there is a LuBest product available to do the job. Our products can be used with mixers, cookers, cutting equipment, freezers, conveyers, blenders, and ovens, just to name some of the varied applications. For more information on how we can help you, please contact your local representative.

Sincerely,

Eddie Hatchett
Vice President/Technical Director
LuBest Division of Momar
