

8-ALIVE

maintain-a-drain

SYSTEM

THE TIME-TESTED TREATMENT SYSTEM

MOMAR™

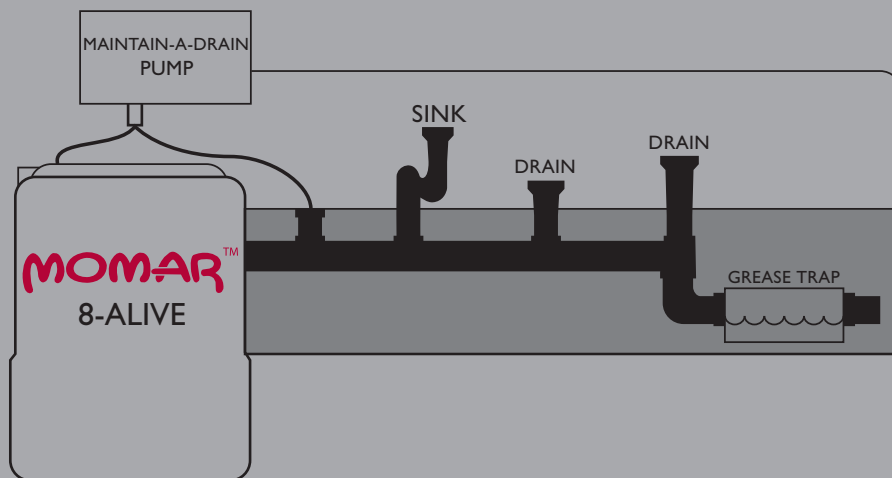

maintain-a-drain™

IT WORKS ON YOUR GREASE TRAPS AND DRAINS.

THE PROBLEM – Overloaded grease traps, slow-moving drains, and backed-up sinks are all serious problems, slowing production and causing costly clogs and blockages. Bad odors can reduce staff morale and drive away customers. Grease buildup can damage pipes, and create a breeding ground for insects and disease-causing bacteria. When large volumes of grease are passed on to municipal waste treatment plants, cities can impose heavy surcharges.

THE SOLUTION – Momar's Maintain-A-Drain System can save you money by preventing costly clogs and blockages. Our systems helps to clean slow-moving drains, overloaded grease traps, backed-up sinks, and obnoxious odors.

8-ALIVE MAINTAIN-A-DRAIN SYSTEM

- The 8-ALIVE Maintain-A-Drain System can be installed in 30 minutes or less. Our experts program the pump to inject 8-ALIVE when it is most convenient for you and your business.
- Using a 24-hour timer, the Maintain-A-Drain pump injects 8-ALIVE daily into drains and traps, liquefying and digesting a wide range of organic waste and preventing buildup.

THAT MEANS YOU DON'T HAVE TO.

- Maintenance costs, including jet-cleaning and pumping drains and grease traps, as well as the in-house labor required to snake through a blockage, can be substantially reduced or totally eliminated.
- The 8-ALIVE Maintain-A-Drain System can eliminate the grease buildup that often results in costly municipal surcharges.
- Drain pipes and grease traps are re-opened and restored to their original size and flow capacity without the use of caustics or strong acids.

Here Are Some Examples of How Maintain-A-Drain Has Fared in Real-World Applications:

"Just wanted to let you know the tremendous results we are getting with your Maintain-A-Drain System. The two biggest problems we were having were backed up drain lines and nasty odors coming out of the grease traps. I was very pleasantly surprised to smell no odors when you and I popped open the grease traps last week. Your help in solving our problem is greatly appreciated."

-Tom Irwin, Supervisor, Plumbing Dept., Sarasota Memorial Hospital, Sarasota, Florida

"I am writing this letter to you because of the effectiveness of the chemicals that I purchase from you. Here at Helen Ellis Memorial Hospital it is vital that our drain lines remain clear and functioning properly. I do not have the time to deal with clogged drains and sewer back-ups. I use 8-ALIVE to maintain my drain lines in the snack bar and main kitchen. Again, this product keeps the grease soft and manageable, and again saves me from major problems."

-Mike Cortese, Maintenance Supervisor,
Helen Ellis Memorial Hospital, Tarpon Springs, Florida

Maintain-A-Drain eliminates all types of drain clogs and blockages.
See the difference for yourself.
