

Description:

Non-flammable, fast-drying safety solvent.
Chlorinated, non-corrosive formula cleans and degreases parts quickly and easily.

Benefits:

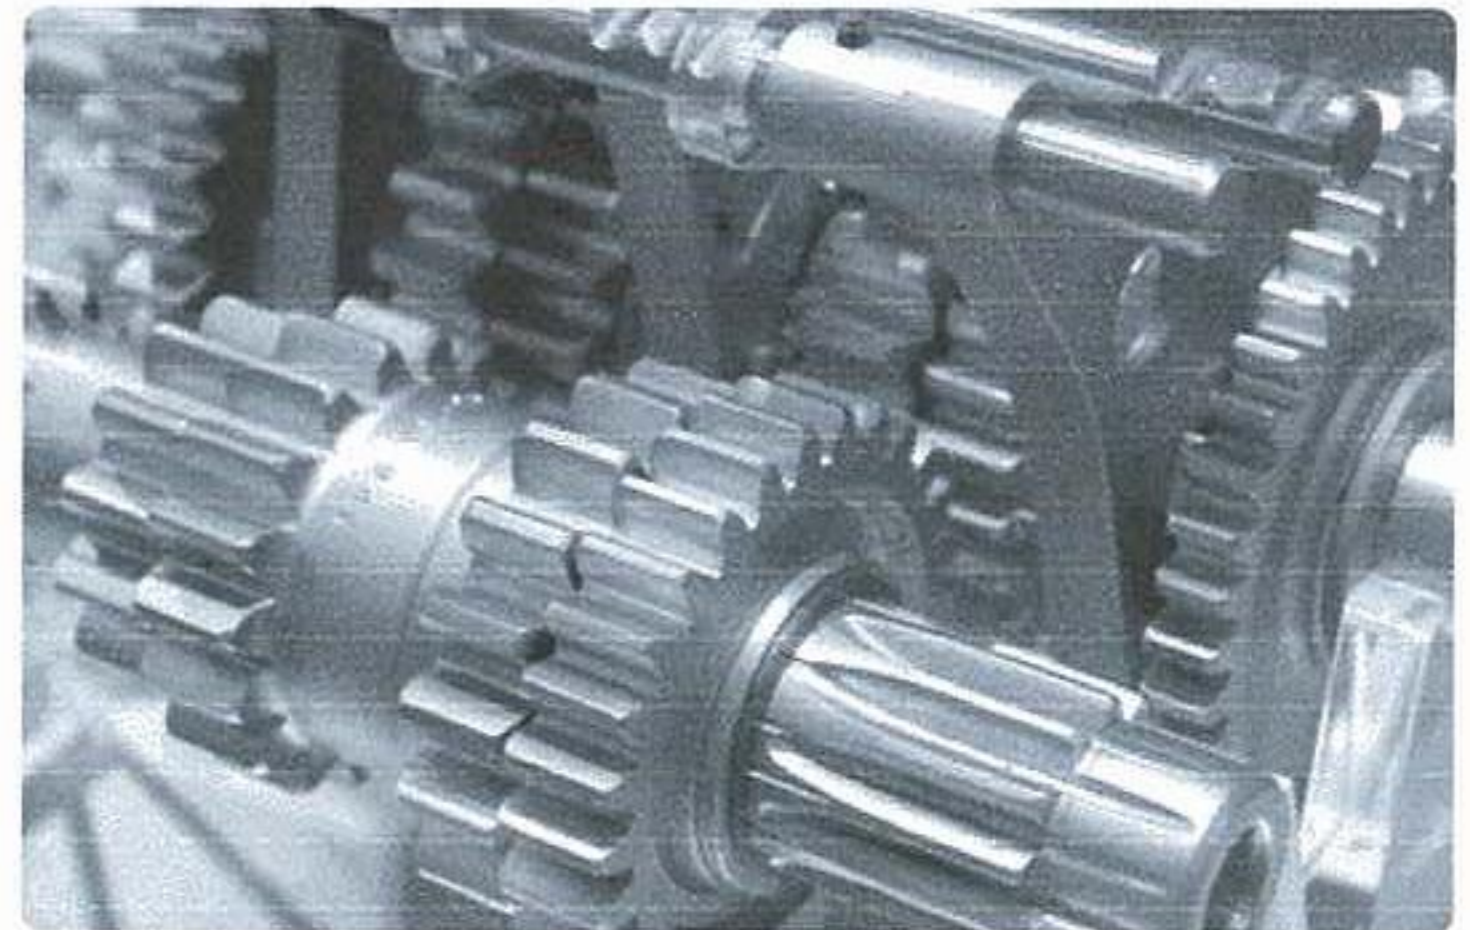

- Cleans on contact -- dissolves dirt, grease, and grime instantly
- Fast-drying -- quickly evaporates reducing downtime
- Leaves no residue -- no film left behind after cleaning
- Non-conductive -- dielectric strength of 45,000 volts
- Non-corrosive -- will not rust parts, components, or other metal surfaces
- Non-flammable -- safe for use in industrial applications
- Colorless -- non-staining
- Powerful -- flushes away soils without injury to working parts
- Versatile -- for use on ferrous and non-ferrous metals
- Safe -- contains an EPA SNAP approved replacement for 1,1,1 - Trichloroethylene

For use on motors, generators, relays, control panels, heating and air conditioning equipment, refrigeration equipment, windings, and power tools.

Perfect for cold degreasing, brake parts cleaning and vapor degreasing applications.

Application:

For general use, spray Quik Clean on surface to be cleaned, wipe or allow to dry. Disconnect all equipment or parts to be cleaned from power sources. Spray motors, generators, other electrical equipment, and industrial parts thoroughly with a heavy stream of Quik Clean to loosen and remove dirt, carbon, and other soils. Allow to air dry or blow dry with compressed air.

Specifications:

Density @ 25°C (ASTM-D-287)	1.61g/mL
Color.....	Colorless
Appearance.....	Clear
Odor.....	Ethereal Odor
Health/Flammability/Reactivity.....	2/0/0
Personal Protection	X - none required
