SAFE!

THE PROVEN DISINFECTANT/CLEANER THAT DESTROYS THE AIDS VIRUS ON CONTAMINATED SURFACES

Disinfectant - Cleaner - Sanitiser - Fungicide - Mildewstat - Virucide - Deodoriser
for Hospitals, Institutional and Industrial use.

SAFE! is a **one-step** disinfectant cleaner that is effective against a broad spectrum of bacteria, viruses (including HIV 1/AIDS virus), fungi, and inhibits the growth of mould and mildew and their odours when used as directed.

SAFE! is registered with the SABS (Reg. No. ACT29GNR529/247367/071/528) in compliance with requirements of the Standards Act (29 of 1993) for Compulsory Specification for Disinfectants.

Apply SAFE! to walls, floors and any other hard non-porous surfaces with a cloth, mop or sprayer so as to thoroughly wet the surfaces.

Disinfection & Cleaning

When tested in accordance with SABS 639-1974, a 99,9% kill within 5 minutes was achieved at the dilutions and on the bacteria shown:

Pseudomonas aeruginosa - 1:150
Escherichia coli - 1:500
Staphylococcus aureus - 1:3000

SAFE! is also effective against the following gram negative and gram positive organisms:

Streptococcus faecalis, Salmonella typhi, Enterobacter aerogenes, Salmonella schottmuelleri, Salmonella choleraesuis, Shigella dysenteriae, Brevibacterium ammoniagenes, Streptococcus pyogenes, Klebsiella pneumoniae, Serratia marcescens, Pseudomonas copacia

SAFE! also passed the **CLEANING EFFICACY TEST** in accordance with SABS 639-1974, at the **dilution rate of 1:50** with water.

Effective against following Viruses:

HIV-1 (AIDS virus)
Herpes Simplex Types 1 and 2
Influenza A/Brazil Vaccinia

The United States Occupational Safety and Health Administration (OSHA) has endorsed SAFE! as "being effective against the AIDS virus on environmental surfaces" following the US Environmental Protection Agency (EPA) substantiating the AIDS virucidal claim (EPA Reg. No. 6836-77-1553).

Extensive tests carried out in the Medical Virology Department of Stellenbosch University also conclusively proved the effectiveness of SAFE! in the presence of blood and other bodily material in which HIV-1 is known to manifest itself. Dilutions of up to 1 in 1000 destroyed infectious HIV cultures in the presence of 20% serum, after a contact time of 10 minutes at room temperature.

Special Cleaning and Decontamination Instructions

Blood and other bodily fluids must be cleaned from surfaces and objects using a 1:50 SAFE! solution. All blood, body fluids, cleaning material and clothing should be sprayed with, or placed in a 1:100 SAFE! solution. Wet cleaned surfaces with a 1:1000 solution and allow to remain wet for at least 10 minutes.

For normal daily protection and cleaning of washrooms, baths, toilets, tables, countertops, handrails etc., use a 1:100 solution.

Fungicidal Control

SAFE! is an effective fungicide against Athlete's Foot Fungus when used in locker rooms, dressing rooms, shower and bath areas and exercise areas, at dilutions of 1:100.

Mould and Mildew Control

A 1:100 solution of SAFE! will effectively inhibit the growth of mould and mildew and the odours caused by them. Apply and allow solution to dry on surface. Repeat when growth returns.

SAFE! GIVES ADDED PROTECTION TO HEALTH CARE PERSONNEL, HOUSEKEEPING AND PUBLIC AREA CLEANING STAFF AGAINST BODY FLUID CONTACT AND THE ASSOCIATED DANGERS OF INFECTION.

**CLEAN WITH CARE,
CLEAN WITH SAFE!**
